

# SR Contractors

## Veneer Attachment

### SR Foam Benefits

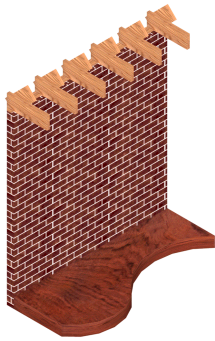

- Reduces water infiltration
- Adds to the shear value of the wall
- Repairs cracked or failed walls
- Great solutions for basement walls

- Ties the building to the foundation
- Less expensive than traditional reinforcing methods
- High insulation properties
- Continuous anchoring

# Ties-Repairs-Insulates-SAVES!

1. **Block between existing floor/ceiling joist and build metal stud wall and apply sheathing to wall**

New or existing masonry or concrete basement wall

SR Contractors' BSW Wall System installation is fast and easy. The SRfoam™ forms to the surface reducing preparation time and cost. Plus, the exceptional strength of the system and high redundancy reduces inspection requirements.

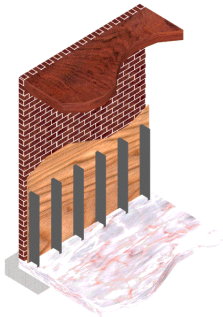

The BSW Wall System provides insulation and a vapor barrier with the seismic strengthening at no additional cost.

SRfoam™ does not contain any CFC blowing agents or other ODS.

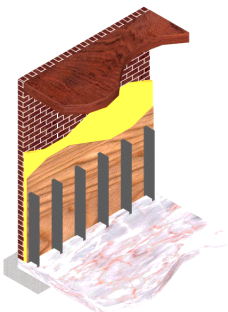

1. **Build walls and lift them up**

2. **Lift wall into place attach the top to ceiling blocking and the bottom to the concrete slab**

3. **Inject SRfoam™ into wall cavity**

2. **Attach to the floor and ceiling**

3. **Install SRfoam™ into wall cavity**
